

PRECISION ABRASIVE WATERJET ACCESSORIES

Permits cutting of one-dimensional bevels up to an angle of 45°.

OMAX® Manual Adjustable Tilt Nozzle

Increase your flexibility with fixed-angle cutting from 0° to 45°.

The OMAX Manual Adjustable Tilt Nozzle is manually adjusted to tilt at a fixed angle from 0 to 45° which allows cutting in one direction on a product. This accessory is a bolt-on attachment that mounts to the Motorized Z-axis of an OMAX abrasivejet cutting machine. The nozzle tilts in the Y-direction away from the operator. Unlike the OMAX Tilt-a-Jet®, this is not under software control.

TILT NOZZLE

Accessory Specifications

MANUAL TILT

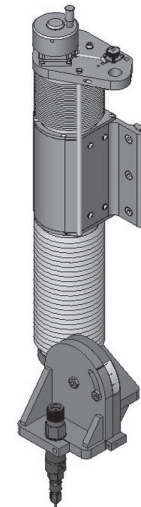

Standard Features

- Tilt fixture is to be attached to a OMAX Motorized Z-axis.
- Manually adjustable fixed angle from 0° – 45°.
