## 激光切管机 PROFESSIONAL PIPES FIBER LASER CUTTING MACHINE

### 适用材料/Applicable materials

专业用于切割碳钢管、不锈钢管、镀锌管、电磁管、硅钢等多种薄壁金属材料。  
Professional for cutting carbon steel tube, stainless steel tube, galvanized tube, electrolytic tube, silicon steel a variety of thin metal materials.

### 性能技术参数 Performance technical parameters

激光输出功率 Laser power	1000W-4000W
激光切割头 Laser mode	光纤激光头 FIBER LASER HEAD
加工精度 Work size	±0.05mm/100mm
管状工件最大切割直径 The working size of pipe of Diameter	6000mm/120-180
切割厚度 Cut thickness	4-5mm
切割速度 The maximum positioning speed of table	3000mm
最大重量 Weight	6000KG/6000/7000KG
外形尺寸 Dimension	8440x3050x2200mm

### 激光切割机优点/Fiber Laser Cutting Machine Advantages

- 高精度、进口大厂的光纤激光器，性能稳定，使用寿命可达10万小时以上。  
Accuracy, German IPG brand China famous Raycus Laser sources, high and stable function, lifespan is over 100,000 hours
- 可加工市场常规的形状：圆管、矩管。  
Processing market conventional circular tube, square tube, rectangular tube
- 配有专业夹头装置，对不同规格和大小尺寸的管材均可进行精密加工。  
Equipped with professional chuck fixture, precision machining of the pipe can be of different shapes and sizes
- 采用进口伺服电机和伺服系统，切割精度高。  
Imported servo motor and gearing system to guarantee high precise cutting

### 切割样品展示 CUTTING SAMPLES
